MAX J. KATZ

Present Address:

53 Edgewater Place, Apt. 1
Edgewater, New Jersey 07020
(201) 943-4712

Permanent Address:

28 Woodland Lane
Smithtown, New York 11787
(516) 724-7669

OBJECTIVE

A challenging position in a pharmaceutical production facility.

EDUCATION

Master of Engineering, Environmental Engineering

STEVENS INSTITUTE OF TECHNOLOGY - Hoboken, New Jersey (May 1996)

Bachelor of Science, Computer-based Management Systems

CLARKSON UNIVERSITY - Potsdam, New York (May 1988)

COMPUTER SKILLS

IBM & MAC environments, Novell LAN

Proficient in MS-Access, MS-Excel, MS-Word, Lotus 123, Harvard Graphics

WORK EXPERIENCE

Lederle Laboratories, Pearl River, New York

Minocycline Focused Factory, Engineering Co-op

Acted as scribe for Process Hazard Analyses (PHA's) in accordance with Process Safety Management (PSM). Coordinated HAZOP meetings. Converted, updated, and maintained HAZOP information in an MS-Access database. Calculated environmental emissions (VOC's) for NEID analysis. Supported the Minocycline Focused Factory LAN in both hardware and software capacities. Established and updated departmental equipment and instrument databases. Coordinated and assisted an outside contractor in writing Mechanical Integrity PMO's. Consolidated department, maintenance, and engineering vendor files for use during PHA's. Conducted air dispersion modeling for Anhydrous Ammonia. (9/94 - Present)

Killam Associates, Millburn, New Jersey

Waste Management Division, Environmental Engineer

Performed Emission Statement Rule reporting, including quantification of combustion sources, storage tanks, fugitive emissions, and emissions from wastewater treatment operations. Conducted an air emissions permit review of a chemical/pharmaceutical production facility including review of more than 100 point sources, preparation of permit applications for new and modified sources, and an evaluation of air emissions data management systems. Experienced in conducting Phase I site assessments, supervising underground storage tank pulls and drilling jobs, and air modeling. 40 hours OSHA trained. (10/93 - 9/94)

Lederle Laboratories, Pearl River, New York

Biochemical Production Section, Engineering Co-op

Developed an automated mass balance system in MS-Excel, by production section and product. Conducted fugitive air emissions testing, using an organic vapor analyzer, in accordance with EPA Method 21. Audited air permits. Performed soil sampling according to EPA protocol. Maintained Operational Readiness Reviews (ORR's). Managed the Biochemical Safety Record database. (1/93 - 8/93)

American Cyanamid Company, Wayne, New Jersey

Chemicals Group, Environmental Affairs, Environmental Assistant

Developed an environmental project management system in Timeline for a major chemical plant, developed a Superfund management information system for over 70 sites, performed air dispersion modeling (ISCLT & ISCST) for several plants, updated and maintained spills information, and SARA reporting of air releases. Interacted with manufacturing plant personnel at 40 locations for regulatory purposes in all environmental media (air, hazardous waste, groundwater). Prepared department budget spreadsheets and cost expenditures reports. Interviewed and trained new Co-op students. (5/92 - 9/92) and (5/91 - 1/92)

Date: 2/9/2005 6:56:40 PM
Subject: Fwd: Re: %Loss/%Gain (after coating) MIR's for Centrum

Good Evening Howard,

After the Vendor visits the plant on Monday, February 14th, what actions to prevent reoccurrence will be completed?

I need you to provide a timeline of the steps you are taking to resolve this issue. Please provide this by close of business February 16, 2005. Thanks.

Max

>>> Howard Henry 2/9/2005 11:25:09 AM >>>
Good morning Andrew,

The vendor is scheduled to visit the plant on Monday, February 14th.

I will inform you should anything change before this date.

Thanks,
Howard

>>> Andrew Espejo 2/8/2005 6:05:47 PM >>>

Howard,
How are we making out with the weigh belt feeder and the vendor.

Andrew

>>> Farooq Moatter 2/8/2005 5:37:42 PM >>>

Jacqueline
Please expedite these MIR's as they will hold the release of several Centrum batches. We should identify the root cause, it appears that we have too many MIR's for accountability issue, are these all in CTC coating?

Thanks
Farooq

>>> Jacqueline Rivera 2/8/2005 1:39:37 PM >>>

Farooq,

There are 9 Centrum batches pending %loss/%gain MIR's.

Jackie

Subject: Important Information for February 2005

Howard,

Please prepare a timeline for completion of the requested work below and forward to Grant Livermore, Andrienne Morris, Andrew Espejo and myself. Thank you for your cooperation.

Max

>>> Grant Livermore 2/3/2005 4:50:21 PM >>>

Andrew,
Maybe you can help me (us), with getting Howard to turn around the Continuous Coaters 1,2 documents we have developed. I know you had a technical problem on one of them this week. This is more of a reason to get this work done, move on to the SOPs and complete this effort, not including Chris Defeciani has a TrackWise commitment of 3/31/05. Having these SOPs (backup/recovery, etc...) in place will protect your systems.

I know Howard is very busy and we appreciate his spending so much time with Tim. If there is any way we can accommodate him, we will. We are very interested in getting this done in Feb 05.

I have Andrienne Morris working on this now and I fully believe her to be the right person to carry on this work, with a high degree of professionalism.

Thank you for your assistance, in advance.

Grant

PS. You have probably heard that I let Tim Billings go, after his unnecessary (and unexplained) outburst(s).

Andrew Espejo - Fwd: Weekly Maintenance Zone Management Checklists

From: Andrew Espejo
To: Henry, Howard
Date: 3/15/2005 7:41:09 PM
Subject: Fwd: Weekly Maintenance Zone Management Checklists
CC: Katz, Max

Howard,

This following email was sent on February 18, 2005. As of this date I have not received the weekly reports from you in accordance with Item No. 3 below. I am concerned that this lack of timely submittal may lead to compliance issues. Please advise if you have been receiving these documents from the Zone Captains and if so your plan for review and submittal to me.

Thanks,
Andrew

>>> Andrew Espejo 2/18/2005 5:57:45 PM >>>

In accordance with PPG00002060, Maintenance Zone Management, the following procedures will be followed:

- 1) Supervisors will conduct audits of their assigned Zones each week. Completed Checklists will be forwarded to Howard Henry, Production Engineer.
- 2) Howard will review and sign each checklist and assign Work Order numbers accordingly and will follow-up accordingly with Maintenance and the Zone Captain (Supervisor). Howard will also follow-up on any missing Zone Checklist.
- 3) Each week, Howard will forward the Weekly Zone Checklists for the previous week to me and I will co-sign and return to Alice for filing.

This process will ensure the timely completion, review, sign-off, and filing of these documents.

If there are any questions regarding this matter please see me. Additionally, please see the revised Maintenance Zone Checklist Assignments:

Zone 3 - Jim Fleming
Zone 4 - Nate Crump (Rich please follow-up with Nate)
Zone 10 - Rich Morgan
Zone 14 - Keith Crump (covering for Chris Snell)
Zone 27 - Ken Flowers
Zone 28 - Tim Tyner
Zone 31 - Jim Fleming

Andrew Espejo - Re: Fwd: Weekly Maintenance Zone Management Checklists

From: Howard Henry
To: Espejo, Andrew
Date: 3/16/2005 5:49:33 PM
Subject: Re: Fwd: Weekly Maintenance Zone Management Checklists
CC: Katz, Max

Good afternoon Andrew,

I have been receiving and reviewing the Zone Reports. Mentioning one issue encountered with the reporting structure/process is that some of the lists have had nebulous descriptions requiring a walk through the area, with the reporting supervisor to properly address the situation, reported observations that should not be on the list and lists which had sections that were not properly crossed out. Having the lists to you weekly should be no problem, once the aforementioned issues are addressed. Bi-weekly meetings will be held if past tendencies transpire but I doubt this will be necessary.

Completed lists will be forwarded to you. Other lists that require further clarification or input will be forwarded to you as soon as possible. I will keep you posted on the progress. The goal is to have them all to you by the end of next week or sooner if feasible.

Have a good day,
Howard

EXHIBIT 5

From: Max Katz
To: Espejo, Andrew
Date: 3/30/2005 5:24:31 PM
Subject: Re: Fwd: Timely Review of PMOs

Andrew,

After reviewing the issue at hand, Howard responded in the following manor.

He felt that it was petty that someone notified me of this problem. His general tone was displeasure towards Maintenance and the responsible person for singling him out. In the past they worked out these issues amongst themselves.

Some of the reasons he gave for being late were:

- 1) The PMO's were late getting to him.
- 2) He received November's PMOs in January and December's PMOs in January and February.
- 3) Many times there are errors, blank spaces or work order's need to be initiated in order to sign off.
- 4) Howard stated that all the PMO's he received before the Christmas holiday's he signed off on before he left.
- 5) When returning from the holidays there was a large amount of work to catch up on.

On the issue of the Weekly Maintenance Zone Checklists, Howard is using a check off sheet and forwarding that to you.

To prevent this from happening in the future Howard will be recording the date he receives the PMO and including that on his PMO tracking sheet.

Any questions or comments let me know. Thanks.

Max

>>> Andrew Espejo 3/29/2005 5:17:27 PM >>>

Max,

This needs to be reviewed with Howard ASAP. This puts us in serious compliance risk. Additionally, Howard has not been submitting the Weekly Maintenance Zone Checklists in a timely fashion as well. I have already spoken to him about this as well as sent him an email regarding his failure to submit these reports in a timely fashion. If warranted we can initiate a PIP to improve his performance.

Thanks,
Andrew

Subject: Fwd: Re: Production Update

>>> Max Katz 1/17/2005 9:01:52 AM >>>
Howard,

Please determine the root cause for the unbolted plate. We need to ensure that we address this so that we don't have a repeat occurrence. Thanks.

Max

>>> Howard Henry 1/14/2005 11:47:13 PM >>>

Good evening, This evening Andrew Abatangelo and Scott Graney informed me that the CTC was shutting down for an Exhaust Air Temperature Alarm issue. The unit was kept in pause mode for 10 hrs during the temperature/humidity excursion issues in the area. This may have contributed to the problem. After inspecting the unit, it appeared that a coil was not emitting enough heat. Instrumentation mechanic Ben Tibay was paged, inspected the unit and adjusted the face and by-pass dampers. The by-pass valve for the inlet coil was also opened. The system coating processed was resumed however the exhaust temp still dropped. Various other parts of the system were checked. Finally, Jerry Rosado recalled hearing a noise in the exhaust section of the coater. After inspection, a plate was found unbolted. The plate was reinstalled and coating resumed at 10:50 pm. WO# 469834 was issued for this job. I would like to thank Jerry for noticing and pinpointing the trouble area, Ben Tibay for his diligent effort helping to troubleshoot the entire system and Joe Piscino and Jim Tonner for their conscientious assistance. Secondly, Susan Lindland requested that weigh door 112A/560, which was stuck in the open position, be checked. After inspecting the door, the door could be closed manually, however it still was not functional. Security was contacted and supervisor Jerry Perioli sent an electrician to the area to access the situation. After inspecting the door, Jerry stated that an electrician from Consumer Health would have to be contacted for electrical schematics to fix the door. Instrumentation Mechanic Ben Tibay accessed the situation and stated that the door would have to be fix by a carpenter. An attempt will be made to have a Consumer Health electrician and a carpenter fix the door. WO# 469835 was issued for this job. Have a good weekend and please contact me if you have any questions. Please feel free to forward this message to individuals inadvertently not on the "To" list who may need to know this information. Gentlemen,
Can we get together and write up a start up procedure soon ? My repeated requests, including to the vendor, have not provided this procedure!
Can not prolong it any longer, need the commissioning done soon.

Thanks
Ram

>>> "Joseph W. Hall" <joe.hall@stevens-industries.com> 1/17/2005 11:11:00 AM >>>
Ram,

In reference to our conversation last week on the start up of the Drag Finisher and Ultrasonic cleaner.
We can not write and SOP for these two products. Both machines come with a manual. If you or your staff can write the simple start up we came review that document and offer feed back.

This issue was discussed with Bishnu in the past.

Please contact me with any questions.

Thank you for your time.

Regards,
Joe Hall

Howard,

I need the memo I requested last week on how and where and for what products the filters are used during the manufacture of Sodium Selenate solution. Please forward me this info or supply a date when I may expect it. Thanks.

Max

Howard,

Please set up a meeting with Thomas Engineering to discuss how we can prevent the situation with the CTC software from happening again. This should be a lessons learned meeting. Please invite the following people to this meeting; Maura Bogardus, Jay Harris, Andrew Espejo, and any others you feel should be included. Please have this set up by Wednesday February 9, 2005. Thanks.

Max

COST

Compression Optimization & Strategy Team

COST Opportunity Statement:

- Compression is a potential bottleneck for Cerebus production
- Compression maintenance needs to be more clearly defined and managed
- Downtime needs to be better managed and scheduled, so as to not impact production
- The team needs to continue knowledge transfer from Fates to bring expertise "in-house"

Project Mobilization

11/2 Core Kickoff Meeting
 11/18-19 Kokofu Compression Shop & Maintenance
 12/3 Cross-functional Team root cause analysis opportunities identified
 1/5 Cross-functional Team "lessons learned" from current rebuild process

Recent Success

| Activity | Complete | Work Steps |
|--------------------------------------|---|---|
| Fates "Overhaul" | 2 Fates have been overhauled by a cross-functional team. "Before" pictures are on the left; "After" pictures are on the right. Held a "Lessons Learned" session with the team to solicit improvements to the process. | Rebuild the 2nd Fate implementing the changes identified in the "Lessons Learned". Held another "Lessons Learned" session after the 3rd, and before the final incorporate into a preventive maintenance plan to maintain current status of Fates. |
| Metals Gathering | In order to understand the current status of Fates maintenance, the team implemented downtime tracking sheets for Setup workers. This data is being compiled, and will be used to identify key opportunities. | This process is being compiled with the OEE data gathering activities, so that there will be one mechanism for gathering all key shift information. This information will be used to create a Visual Factory for Compression. |
| Cross-Functional Process Improvement | Compression Team includes Setup workers, Compression Management, Production Management, and Engineering and Maintenance. Regular meetings between these groups has facilitated the development of Job Plans and Preventive Maintenance schedules for the Fates. | The team is going to divide into two work streams: one will focus on implementing a Total Productive Maintenance (TPM) model for the Fates. The other is going to focus on optimizing the time to execute a changeover. |

Howard,

Please prepare a timeline for completion of the requested work below and forward to Grant Livermore, Andrienne Morris, Andrew Espejo and myself. Thank you for your cooperation.

Max

>>> Grant Livermore 2/3/2005 4:50:21 PM >>>

Andrew,

Maybe you can help me (us), with getting Howard to turn around the Continuous Coaters 1,2 documents we have developed. I know you had a technical problem on one of them this week. This is more of a reason to get this work done, move on to the SOPs and complete this effort, not including Chris Defeciani has a TrackWise commitment of 3/31/05. Having these SOPs (backup/recovery, etc...) in place will protect your systems.

I know Howard is very busy and we appreciate his spending so much time with Tim. If there is any way we can accommodate him, we will. We are very interested in getting this done in Feb 05.

I have Andrienne Morris working on this now and I fully believe her to be the right person to carry on this work, with a high degree of professionalism.

Thank you for your assistance, in advance.

Grant

PS. You have probably heard that I let Tim Billings go, after his unnecessary (and unexplained) outburst(s).

Howard,

Have you set up the meeting with Thomas and our IT folks yet?

Max

>>> Howard Henry 2/8/2005 4:39:25 PM >>>
(Please change your settings to HTML by going to View, and highlighting HTML in order to view this e-mail in its original format.) Good afternoon, Don Slevin of the IT department made a copy of the CTC#2 computer system this afternoon. Back up disks will be created and stored in the Engineering Software Library and the Maintenance Library. Marina Brin of Thomas Engineering contacted me today. She stated that at the onset of the CTC project, anticipating the final goal of running both CTC units in a single pass configuration, back disks were not created for the CTC double pass program (currently the program used in CTC#1), but would be created for the CTC single pass program (currently the program used for the CTC#2 system). She stated that she has the disks for the current CTC#2 program and will send this material to my attention as soon as possible. Again, once this material is received, copies will be made and stored in the Engineering Software Library and the Maintenance Library. Have a good day and please contact me if you have any questions. Cordially, Howard

Good Evening Howard,

After the Vendor visits the plant on Monday, February 14th, what actions to prevent reoccurrence will be completed?

I need you to provide a timeline of the steps you are taking to resolve this issue. Please provide this by close of business February 16, 2005. Thanks.

Max

>>> Howard Henry 2/9/2005 11:25:09 AM >>>
Good morning Andrew,

The vendor is scheduled to visit the plant on Monday, February 14th.

I will inform you should anything change before this date.

Thanks,
Howard

>>> Andrew Espejo 2/8/2005 6:05:47 PM >>>

Howard,
How are we making out with the weigh belt feeder and the vendor.

Andrew

>>> Farooq Moatter 2/8/2005 5:37:42 PM >>>

Jacqueline
Please expedite these MIR's as they will hold the release of several Centrum batches. We should identify the root cause, it appears that we have too many MIR's for accountability issue, are these all in CTC coating?

Thanks
Farooq

>>> Jacqueline Rivera 2/8/2005 1:39:37 PM >>>

Farooq,

There are 9 Centrum batches pending %loss/%gain MIR's.

Jackie

Forklift Inspection
Assignment...

>>> Max Katz 2/17/2005 7:04:32 AM >>>
Howard,

We need to get an accountability of all forklifts in our area and do a gap analysis of which Supervisor is responsible for which Forklift. Attached is the forklift inspection assignments sheet that Mike D'Amato put together. Please update this sheet and have a Supervisor responsible for 2 forklifts. Please have this completed by close of business Monday March 7, 2005. Thanks.

Max

Howard,

How is the work on this commitment going? Are you near closure? Please give me a status update. Thanks.

Max

Subject: Hot Items

Howard,

We you get in please come see me. The following 3 items are Hot:

- 1) Please have Alice Gass walk around the Change Control for the 8 K Shaker screen so we may use it some time today. Also the screen must be cleaned before installation.
- 2) Manny Rivera has been using 10566J for a Job Aid/Skill Check. This needs to be updated immediately for the CTC split, instead of having them cross out sections. If this has already been done we need to communicate it to Manny.
- 3) We have a commitment for 6/3/05 to Update FRMs 00000602, 00000615 and 00001400 to reflect cleaning between batches of the same formula. (I have this info).

Thank you.

Max
